ORDER THE BOLUS

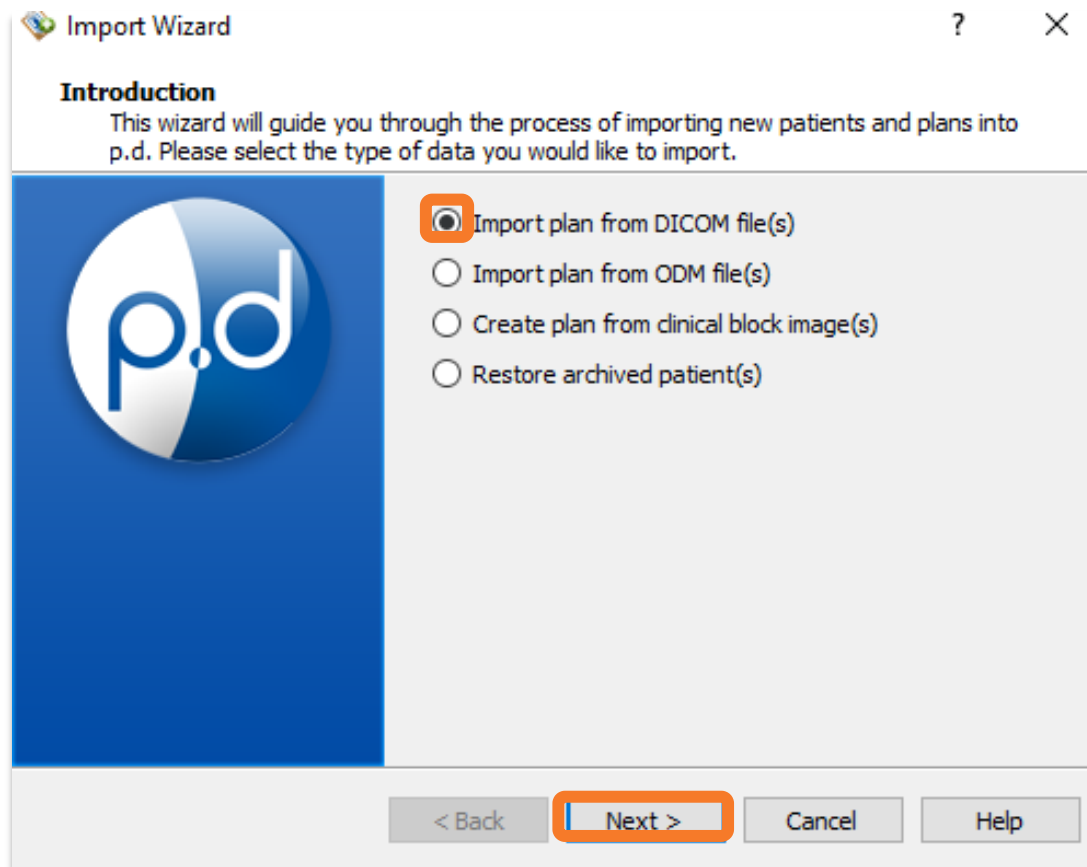

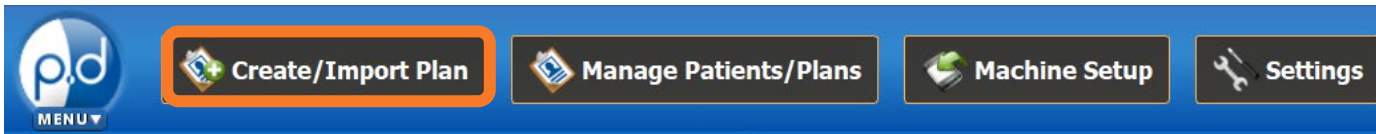

# DESIGN THE BOLUS IN YOUR TPS

- Design the bolus in **your treatment planning system (TPS)**.
  - Design the desired thickness over the patient surface for the intended bolus material.
  - *NOTE: For FlexiBol silicone boluses, ensure your bolus is at least 3 mm thick in all places. See White Paper MAT-001: FlexiBol Material Specification Sheet.*
  - Ensure adequate coverage of the patient with respect to the treatment beam(s).
  - For a Blue Wax bolus, use a **physical** density of 0.92.
  - For a FlexiBol bolus, use a **relative electron** density of 1.025 ([click here for details](#))
- Make sure the RT Structure Set includes, at minimum, the patient external structure and the bolus structure.
- Make sure at least one treatment beam is defined in your treatment plan.
  - *NOTE: Our software will not require a calculated RT Dose but does require an RT Plan.*
- Use the TPS DICOM export method to save the CT images, the RT Structure Set, and the RT Plan to a specified folder.
  - *NOTE: This folder needs to be accessible to the p.d software to read the TPS-generated files.*

# IMPORT DICOM FILES INTO P.D

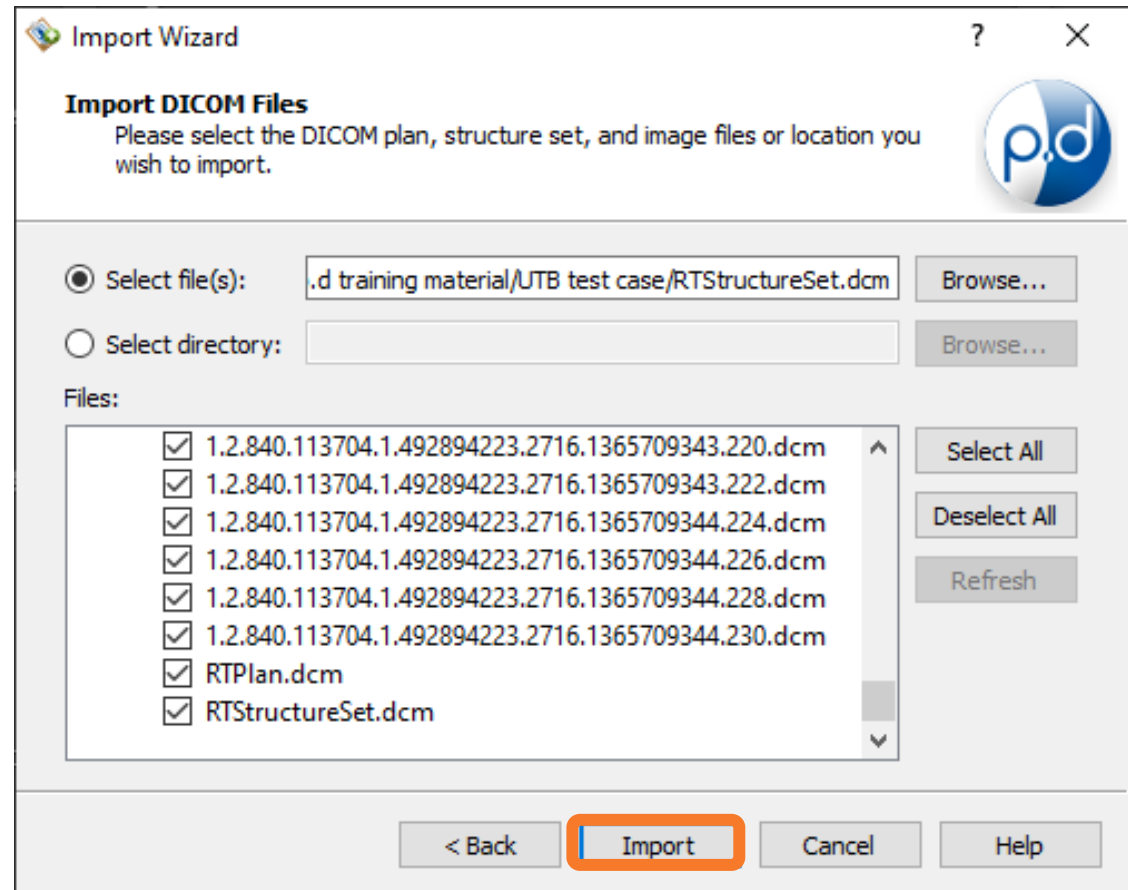

- Open the **p.d software** and sign in.
  - *NOTE: Ensure the p.d version is current.*
- Click **Create/Import Plan** from the top blue bar.
- Select **Import Plan from DICOM file(s)**.
- Select **Next**.

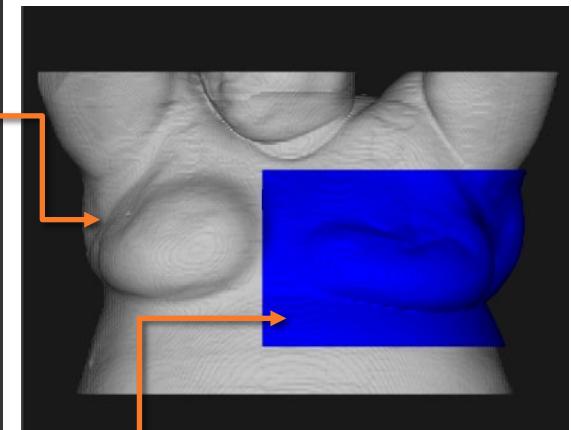

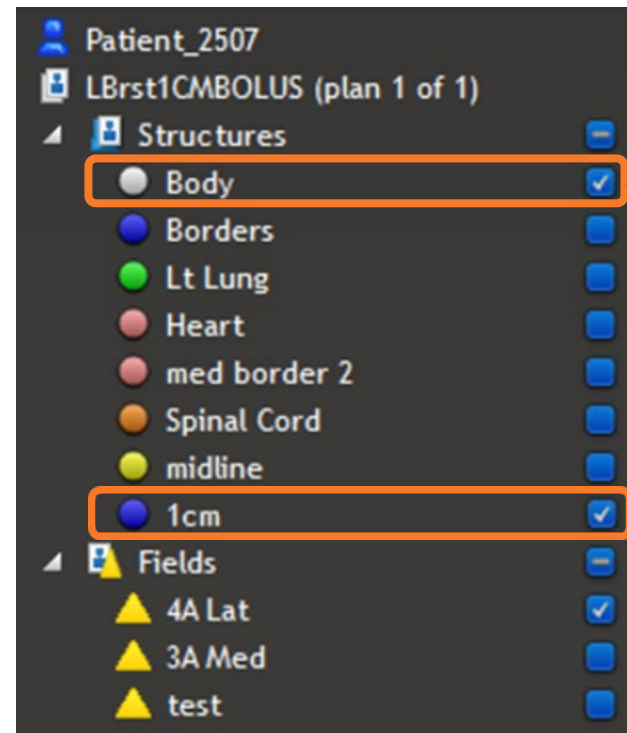

## IMPORT DICOM FILES INTO P.D

- Browse to the folder where you exported the DICOM files.
- Select all the required DICOM (\*.dcm) files:
  - CT images
  - RT Structure Set
  - RT Plan
- Select **Import**.

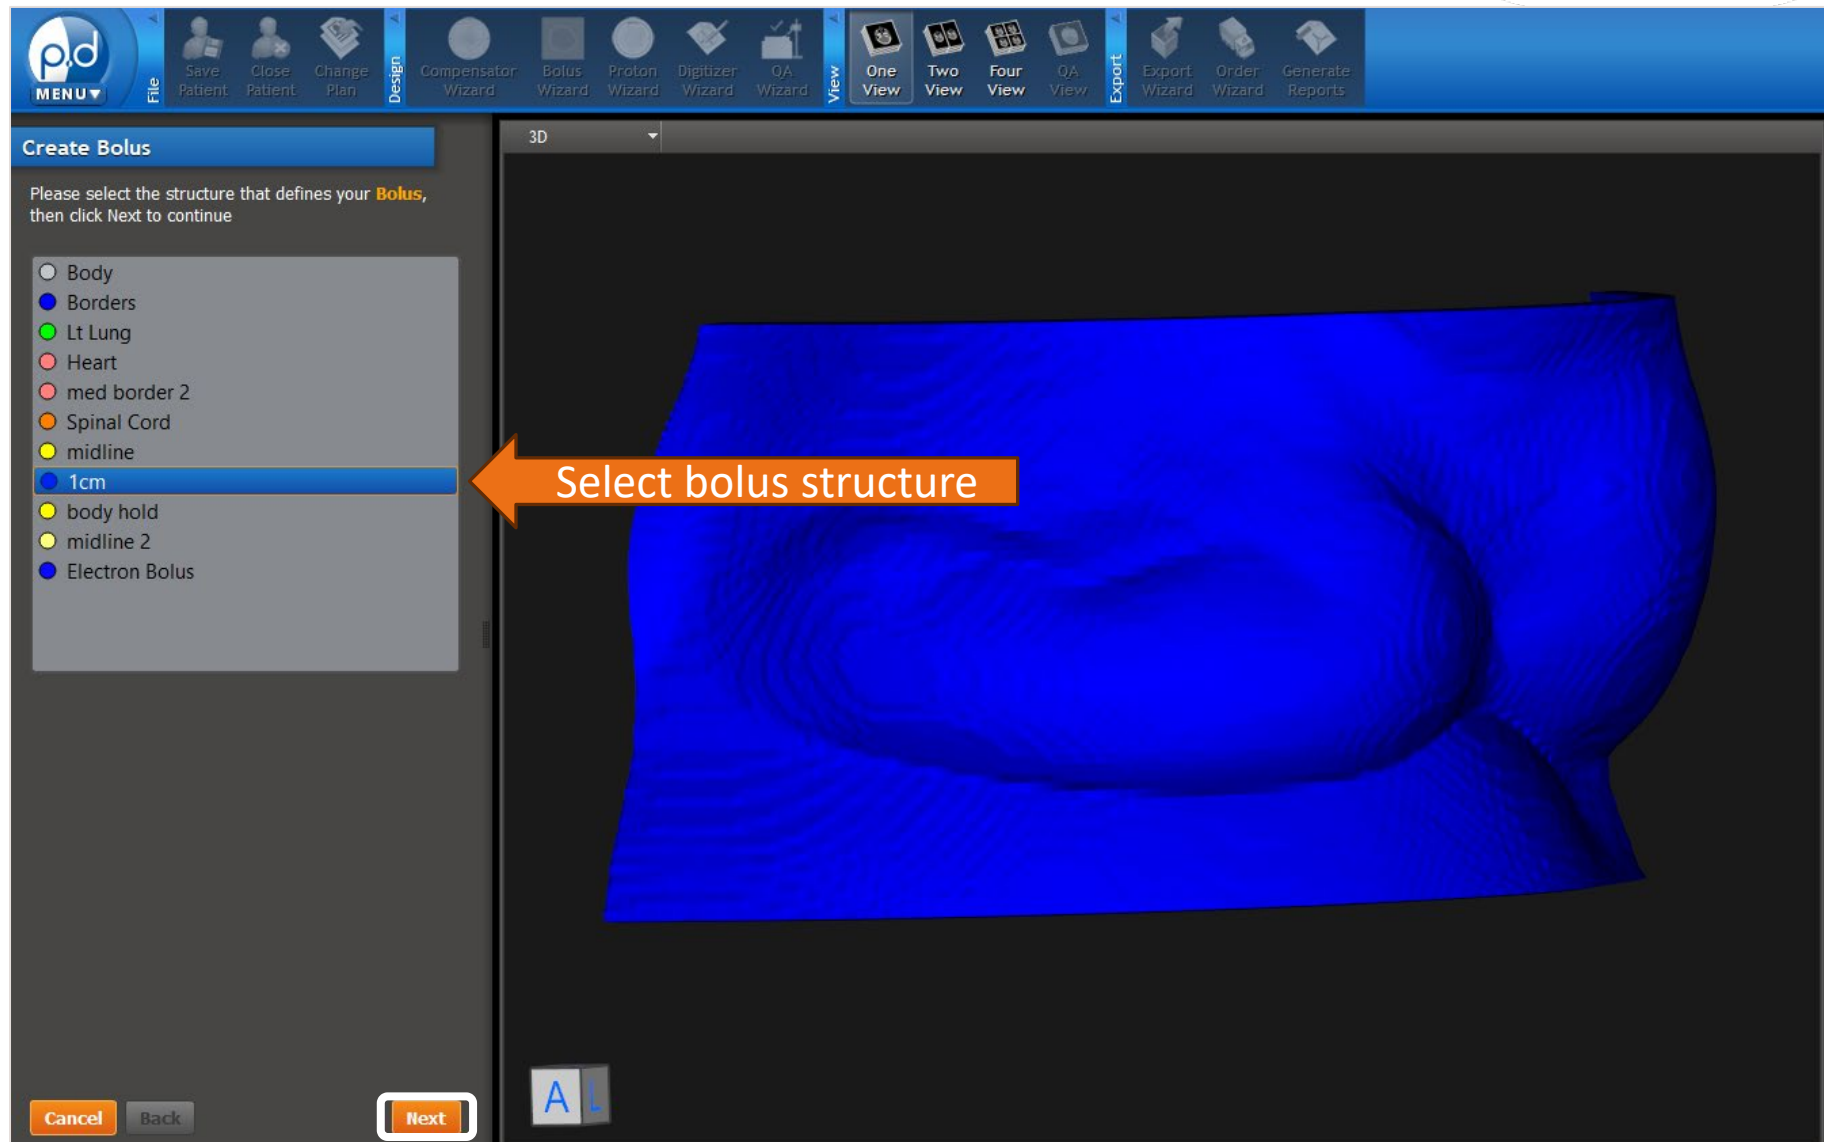

## SELECT AND REVIEW CONTOURS

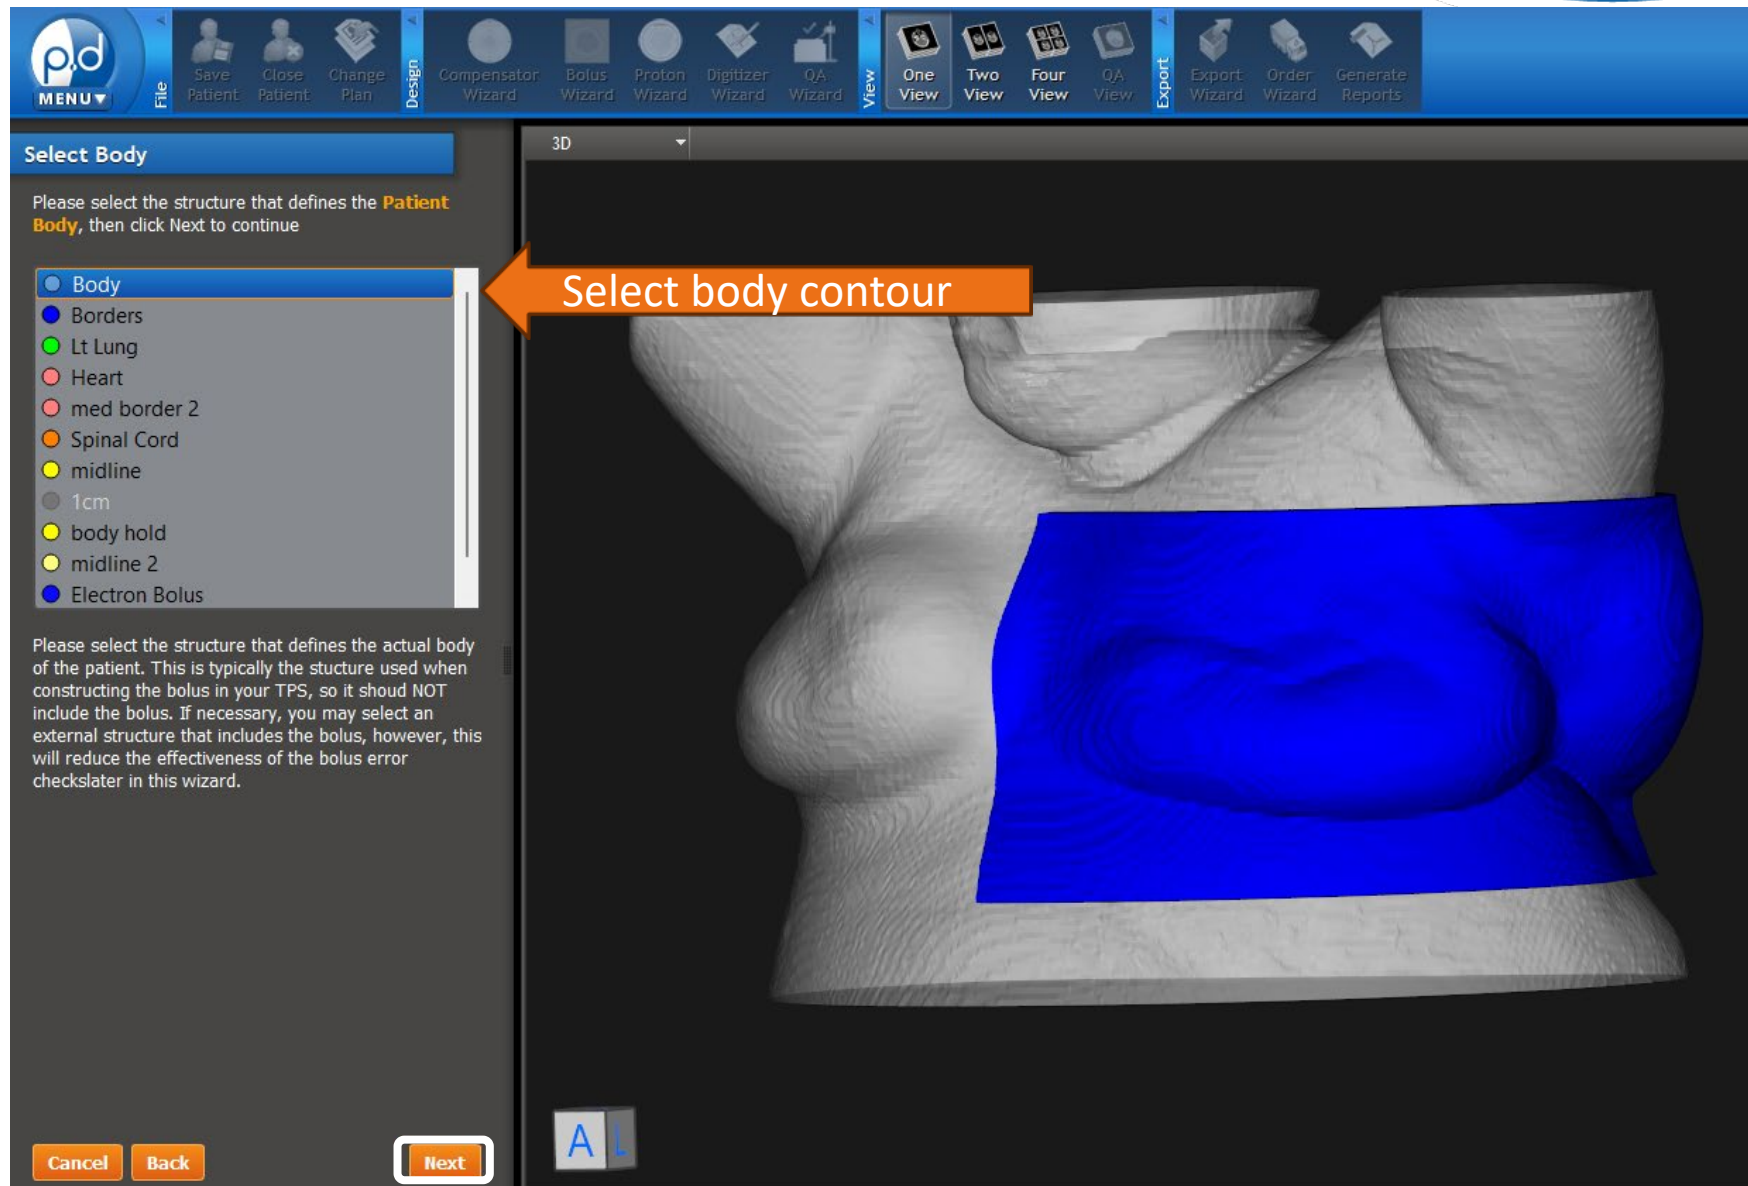

- Once the files are imported, **turn on the view** (i.e., check the checkbox) for the **body structure**, and **bolus structure** to verify that you imported the intended dataset.
- Use the **3D View** to review the bolus structure carefully, looking for defects in design such as holes or stray pieces outside the treatment beam(s). See the [FlexiBol Starter Guide](#) for more details on how to review the bolus design.
- Select the **Bolus Wizard** from the **Design** section of the toolbar.

# THE BOLUS WIZARD: RUN ERROR CHECKS

# THE BOLUS WIZARD: ERROR CHECKING

## Failed Error Checks:

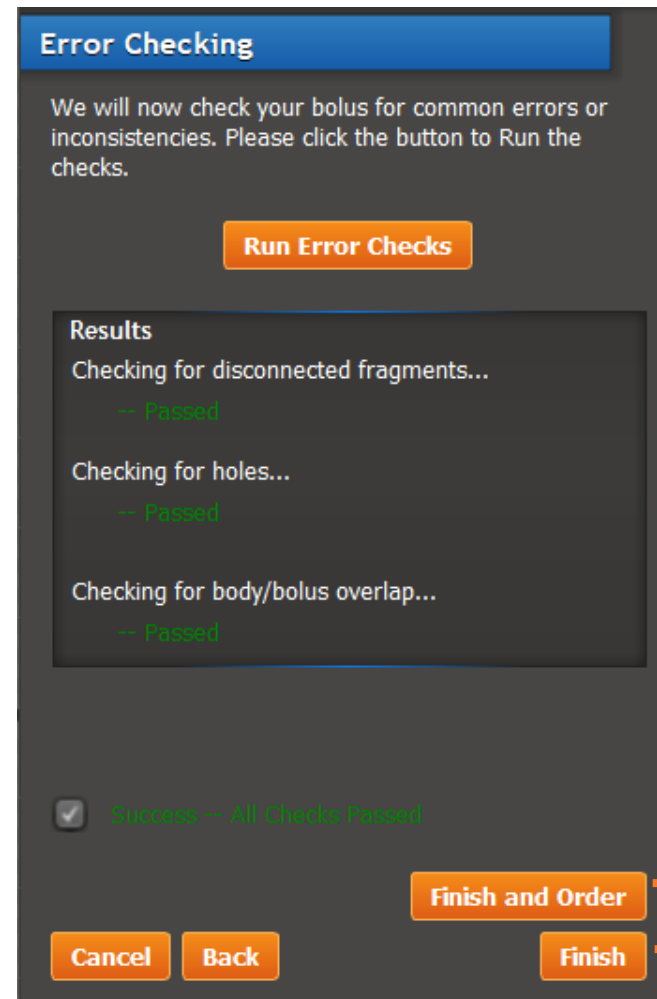

Please review carefully and only proceed if you are certain everything is correct.

**Cancel:** Return to Patient Window

**Back:** Go to previous page

## Passed Error Checks:

**Finish and Order** → Order Wizard

**Finish** → Return to Patient Window with finished bolus

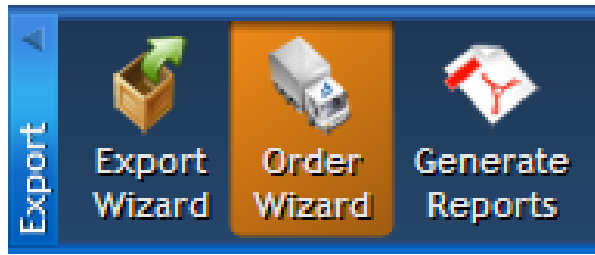

## THE BOLUS WIZARD: CUSTOMIZE LABEL

Please enter the information you would like included on your bolus device tag.  
(Note: For HIPAA compliance do not enter PHI).

Bolus Tag Text:

This text will appear on the tag / label attached to the bolus. Please ensure you do not include any PHI to maintain HIPAA compliance.

# ORDER THE BOLUS

- If you are in the Patient Window, select the **Order Wizard** from the *Export* section of the toolbar.

## Welcome to the Ordering Wizard

This wizard will help order your devices through .decimal Direct. Please make your selections to continue.

Material & Type	Size	Device Tag / Engraving
<input checked="" type="checkbox"/>  Silicone Bolus	L	 You Can Customize...

Click the pencil icon above to edit the device tag (CompID), if desired.

< Back   **Next >**   Cancel   Help

- Check the box next to the device.
- Click *Next* to proceed.

## Shipping Information

Please verify the shipping information below (\* indicates a required field).

Account# (SiteID):

Institution Name\*:

Address Line 1\*:

Address Line 2:

City\*:

State/Province\*:

Zip/Postal Code\*:

The default address shown above is shared with all users at your site and can be managed through the Machine Setup page. Click [here](#) for more information.

## Billing Information

Please enter PO Number for billing below (optional).

P.O. Number (optional):

The provided PO# will appear on the invoices that .decimal sends for this order. This information is optional, but may be required by your finance department in order to remit payment. Please check the policy with your local finance dept.

- You will now see the **shipping information screen** where you will fill out and/or verify the address where the device will be shipped, and select **Next**.
  - The shipping address will be set based on the machine selected during import. See the software **Help Menu** for more information on how to set shipping addresses.
- Enter a PO number if applicable and select **Next**.
